Dear Prospective Delegate,

We are delighted to extend an invitation to you for our upcoming Continuing Medical Education (CME) program and workshop on coagulation, and cytometry designed specifically to introduce clinicians and postgraduate students to the dynamic field of Hematology. Our primary goal is to provide participants with a comprehensive grasp of the intricate mechanisms underlying thrombosis and hemostasis. Through expert-led sessions and interactive discussions, attendees will gain valuable insights into the pathophysiology, diagnosis, and management of thrombotic and hemostatic disorders.

Flow cytometry has emerged as a vital tool for diagnosing and classifying lymphomas recently. In this CME, we aim to provide detailed immunophenotypic profiles of cells, facilitating the precise diagnosis of chronic lymphoproliferative disorders. Additionally, the intriguing cases discussed will showcase the diverse applications and pivotal role of flow cytometry in hematopathology.

Moreover, we endeavor to kindle an appreciation for the myriad opportunities available in the realm of Hematology, spanning both laboratory-based research and clinical practice. We are optimistic that this exposure will ignite interest among participants, stimulating contemplation of Hematology as a fulfilling career path. This program is specifically tailored for clinicians, postgraduate students of medicine, pediatrics, and pathology training.

We are pleased to announce that this CME and workshop has been accredited by the Uttarakhand Medical Council for 4 CME credit hours. Participants will earn accredited CME points upon completion.

We encourage all participants to approach the program with eagerness and readiness to actively participate, maximizing the benefits derived and fostering meaningful interactions with fellow participants and facilitators.

We eagerly anticipate your presence at this enriching educational endeavor.

Warm regards
