

E MEDI-ACADEMY

BRIDGE THE GAP

FOUNDATION IN GASTRO- INTESTINAL PATHOLOGY

Join if you face problems in:

- Identifying and classifying key GI pathologies (esophagus, stomach, intestines and pancreas) using the latest WHO classification and updated reporting protocols
- Correlating histological patterns with clinical and endoscopic findings in both benign and malignant GI lesions
- Applying IHC, special stains, and molecular diagnostics in complex differentials (e.g. GIST vs. mimics, neuroendocrine tumors, IBD vs. dysplasia)
- Staying current with prognostic and predictive markers, grading/staging systems, and evolving therapeutic implications
- Interpreting GI biopsies and resections accurately and reporting with confidence — from academic settings to real-world pathology labs

Class Information

- 20 Online classes starting from Jul 2025
- Classes scheduled once a week
- 3 self assessments
- Certificate course
- Videos and reading material will be available online to enrolled participants

Trainer:

Dr. Lipika Lipi

**Associate Director, Histopathology
Medanta, The Medicity**

GB Pant institute of Medical Education and Research, Short clinical fellowships in GI-pathology from Mayo clinic Rochester and Brigham & Women's college, Harvard University, Boston
