

Breast Pathology Fellowship Program Chennai Breast Centre, Chennai

Chennai Breast Centre, a boutique NABH-accredited facility renowned for its comprehensive breast health services, invites applications for a 6-month Breast Pathology Fellowship. This program is designed for freshly qualified/ junior MD/DNB pathologists looking to specialize in breast pathology. The main objective of the program is to provide the fellow with proficient diagnostic skills and in-depth understanding of the implications of pathologic diagnoses in the management of breast cancer patients

Why Choose Chennai Breast Centre?

- ✓ Advanced infrastructure: Leica and Ventana instruments with test menu ranging from core needle biopsies to dual in situ hybridization.
- ✓ Yearly statistics: Total no of samples: 1200-1300; IHCs and DISH: 500; No. Of surgical samples: 350-400
- ✓ Comprehensive exposure: Hands-on training in:
 - Reporting Core needle biopsies, Stereotactic biopsies and referral cases, Frozen Sections
 - Immunohistochemistry and dual ISH.
 - Surgical samples including oncoplastic specimens, prophylactic surgical samples and wide local excisions
 - Tumor banking
- ✓ Multidisciplinary learning environment: There is extensive emphasis on a multidisciplinary approach to specimen evaluations, and the fellow interacts closely with senior pathologist, breast surgeons and radiologists in the evaluation of samples

❖ Learning Outcomes

- To develop sufficient expertise to classify benign, premalignant lesions, invasive carcinoma and other breast lesions and the clinical implications of these diagnosis.
- Participation in research and academic initiatives. The fellow is encouraged to present a minimum of one paper/ poster presentation at a conference and publish a paper in a journal at the end of the fellowship.
